

## **Bio of Marc Andre Lavoie**

Marc is a recognized leader and manager in the domain of environment, health and safety with a core strength in occupational hygiene and a wide range of local and international experience. He possesses an analytical style to approach complex problems and quickly identifies key issues at state. Marc always enjoys a challenge and is appreciated for balance between technical skills, dedication and imagination for resolving issues.

Marc has excellent communication skills demonstrated by clarity and simplified resolution to complicated situations. His services at Risk Marcker include quantitative and qualitative Risk Assessments for chemical, biological, physical and psychosocial hazards, develop and provide training for the workforce and managers, implementation and audit of management systems, develop product stewardship and assess compliance to existing and emerging EHS regulation, developing a customized health strategic plan.

As a course lecturer at McGill University, Marc taught industrial hygiene and airborne contaminant monitoring to graduate students in the Department of Epidemiology, Biostatistic and Occupational Health.

Marc was nominated by the NS minister of labor to be on the NS Occupational health and safety advisory committee (2018-2021)

At the University of Quebec Marc was a Professor in the Industrial Relations department and taught industrial toxicology and hygiene including courses on metabolism, kinetics, effects classifications, toxicity variation factors, existing standards and limitations, surveillance and WHMIS. He received the 'excellence in education' recognition from the University Dean from this role.
